Career Summary

Strategic Frontend Software Engineer with 3+ years of experience building sophisticated web applications in fintech, healthcare, and education. Expertise in creating responsive, accessible solutions with React, Vue.js, and TypeScript, complemented by proficiency in Node.js and Laravel. Proven ability to deliver high-performance applications using advanced state management, optimized APIs, and modern JavaScript practices, empowering thousands of daily users. Consistently achieve 99% client satisfaction and excel in leading cross-functional teams to drive frontend innovation and deliver exceptional user experiences.

EXPERIENCE

Level Up Academy, Remote — Frontend Developer

Oct 2024 - Date

- Gained comprehensive training in command-line tools, Git, Docker, PHP, Laravel, Jenkins, CI/CD and design patterns.
- Developed React-based web applications utilizing modern features like Hooks, Context API, react router loaders etc.
- Engineered responsive interfaces with 98% cross-browser compatibility using React.js, TypeScript, React-query. Tailwind and Mantine CSS.
- Optimized API integration patterns resulting in 30% reduction in data fetching latency.
- Developed and integrated backend solutions using REST APIs ensuring 90% security while addressing bottlenecks for scalability and low latency.
- Conducted rigorous testing and debugging to ensure 80% stability, compatibility, and performance across devices and browsers.
- Applied Agile development methodologies to collaborate effectively and deliver iterative improvements while achieving 95% sprint completion rate.

Tech Stack: PHP, Laravel, React, Mantine, Rest API

TECHNOLOGY

Languages: HTML5, JavaScript, TypeScript, CSS

Frameworks: NextJS, NuxtJS, ReactJS, VueJS, ExpressJS, NodeJS, Laravel

UI Libraries: MaterialUI (MUI), SASS, TailwindCSS, Bootstrap

Tools/Libraries: Git, GitHub, GraphQL, Storybook, Redux, Redux Toolkit, SPA, Pinia, Vuex, Docker, Ansible, Kubernetes, Terraform, KVM, Ceph, Foreman, OpenStack, OpenNebula,

LANGUAGES

Igbo, English, Hausa

INTERNSHIP

Zuri, HNG, Novustack, Start.NG

DPanalytics, Remote— Frontend Engineer

APR 2024 - Sept 2024

- Developed high-performance web applications using Next.js and React, achieving 95% performance score on Lighthouse.
- Reduced page load time by 45% through code splitting and lazy loading implementation.
- Collaborated with cross-functional teams in an Agile environment, delivering 8 major features ahead of schedule.
- Implemented responsive designs using Tailwind CSS, ensuring mobile-first approach with 99% device compatibility.

Tech Stack: ReactJS, NextJS, Nodejs, Tailwind, Rest API

KodeHauz, Akwa Ibom— Frontend Engineer

AUG 2023 - Sept 2024

- Developed interactive, responsive web components using Nuxt.js and Vue.js to deliver enhanced user experiences.
- Established and maintained GitHub workflows, increasing team productivity by 25%.
- Mentored interns, guiding 5+ projects to successful completion while fostering team skill growth.

Tech Stack: ReactJS, NextJS, Vuejs, Nuxtjs, GraphQL

Deficonnect, Lagos— Frontend Developer

FEB 2023 - APRIL 2023

- Designed responsive interfaces with React.js, Material-UI, and Next.js, delivering exceptional user satisfaction across platforms.
- Optimized site performance by collaborating with cross-functional teams to address critical issues.
- Participated in weekly code reviews, reducing bugs by 50% and improving code quality.

Tech Stack: ReactJS, NextJS, NodeJs

Kodehauz, Akwa Ibom — Frontend Developer

AUG 2020 - MAR 2023

- Developed and maintained 10+ web applications using Vue.js, Nuxtjs and React.js.
- Integrated complex REST APIs and GraphQL endpoints for real-time data synchronization .
- Conducted training sessions impacting over 3000 participants through KodeCamp web development training.

Tech Stack: ReactJS,VueJs, NuxtJs, Grapql, Rest API, NextJS, NodeJs

Deficonnect, Lagos — Frontend Developer

NOV 2021 - JULY 2022

- Increased website performance by 40% through implementation of modern JavaScript practices.
- Transitioned a website to HTML powered by NodeJS, improving website performance by 40%.
- Integrated multiple third-party APIs for real-time cryptocurrency data and trading functionality.

Tech Stack: ReactJS, NextJS, NodeJs, REST API

Upshoot tech., Lagos — Frontend Developer

JUNE 2021 - AUG 2021

- Developed a learning management system using Vue.js and Nuxt.js, supporting 2,000+ users.
- Implemented state management using Vuex, resulting in 30% improved application reliability.
- Reduced API response time by 25% through optimized data fetching patterns

Tech Stack: VueJS, NuxtJS, NodeJs, REST API

EDUCATION

Michael Okpara University, Abia State — B.eng Computer Engineering

SEPT 2012- SEPT 2017
